3. IMPORTANT NOTES

Precautions to take

Integration at the Canoe Club

Recommendation for Events

1. ADAPTATION

Why Adapt the Equipment?

- For comfort
- For security of the paddler and the coach
- To aid the transmission of power
- To integrate paddlers
- For performance

Special Seats

Adjustable seat with backrest

Seat for amputee

**Seats manufactured for
those with prosthetic limbs**

**The pelvic support is very important as
it helps transmit the power of each
stroke and give the paddler balance.**

A customised seat for those with prosthetic limbs

The legs rest on a long surface and the backrest is tilted to avoid muscle spasm.

**US seat manufacturer:
www.creatingability.com**

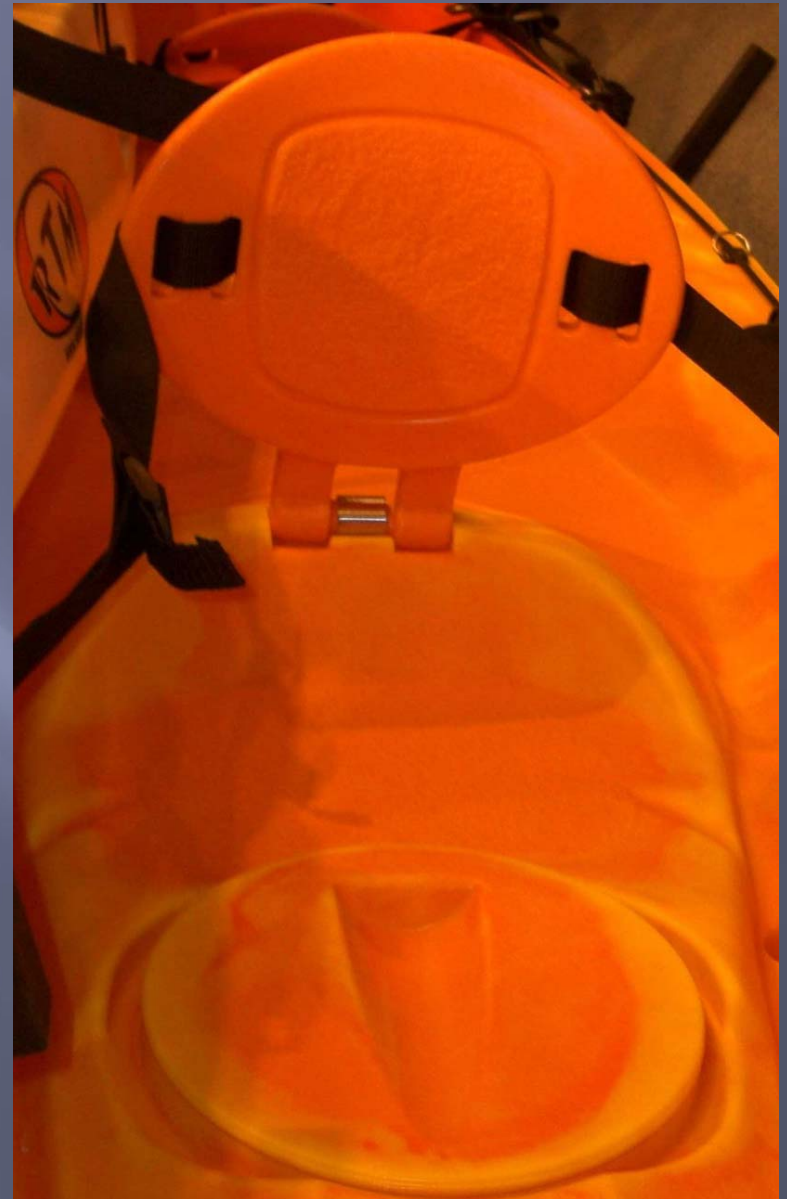

Backrests from Manufacturers

www.dag-kayak.com

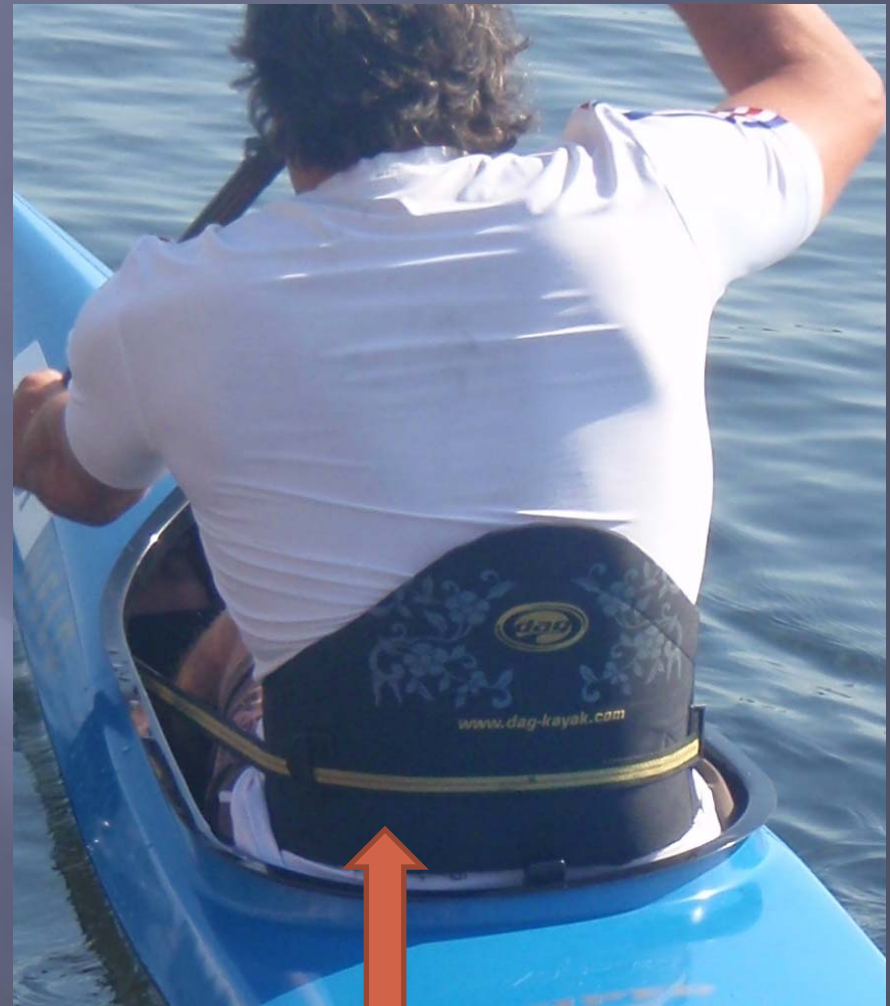

12/08/2009

Romain DIDIO / Cyril FOURNIER
FRANCE

This maintains lumbar support and compensates for the lack of a backrest

“Do it Yourself” Adaptation

Romain DIDIO / Cyril FOURNIER
FRANCE

Adaptation for Amputees

Romain DIDIO / Cyril FOURNIER
FRANCE

**The rudder
adapted for
leg amputees**

The support of the amputated leg is necessary for balance, comfort and to help transmit the force of the stroke.
